

ADDING A LINK TO A WIKIPAGE

1. Sign into the wiki.
2. Go to your page (or create a new one).
3. On the editing toolbar, look for the link icon—this will let you add an external or internal link:
If internal, just select the page to link to. (I recommend clicking the box “open in new window.”)
4. Don't forget to click “change link” to finish.
